

From the inventors of professional turf maintenance.

As a manufacturer of professional specialised machines, our entire passion is applied to turf. No matter whether on the golf course, in large sport stadiums around the world, or in the municipalities – the care of professionally employed lawns and turf are especially close to our heart. We have made this passion our profession, and thanks to our experience and know-how, we have also expanded to artificial turf maintenance and dirt and snow removal.

Our high-quality accessory equipment for compact tractors and municipal equipment carriers deliver complete solutions for turf regeneration as well as the collection or removal of grass and leaves. Highly-specific mowing machines, turf sweepers, sweepers for snow and dirt, snow raker blades and winter service spreading machines round off the product range and convince our customers by their efficiency and practicability. No matter what the season, no matter what the purpose – as professionals, we know what professionals need.

SUPER 500/600

The universal turf maintenance machine for year-round intensive use on golf courses, sports fields and in municipal work

- Sweeping, scarifying, mowing
- Turf-friendly collection of grass and leaves
- Parallel suspended high dumping

We love turf. www.wiedenmann.com

The advantages:

Infinitely variable high dumping
at every height to max. 210 cm.

Optimal work position
of the tools due to parallelogram guided suspension.

Maximum stability
and slight ground contact pressure due to large-volume quadruple tyres.

Electronic remote control
of the operating elements with safety function.

Ideal ground adaptation
also in uneven grounds thanks to fully floating working head.

Multi-sweeper head
can be flexibly equipped with air paddles, flail blades, and scarifier blades

An overview of the individual machines:

SUPER 500

A multitalent with infinitely variable high dumping and two different working heads.

SUPER 500 with multi-sweeper head

For scarifying, flail-mowing and collecting leaves with shredding function.

- Equipment version options: electromagnetic remote control, lighting system, side anti-scalp rollers, Golf Course Kit, Super Contour Kit, Core Crusher Kit
- Two anti-scalp rollers attached on the side additionally prevent scalping the surface.
- The Golf Course Kit consists of a leading steel roller specifically developed for use in especially undulating terrain.
- The rollers contained in the Super Contour Kit support the multi-sweeper head for precise application in the rear area.

- The Core Crusher Kit offers the further option of collecting aerification material, shredding and then depositing again over a large surface.

SUPER 500 with brush sweeper head

For the careful collection of leaves, cuttings, and scarified material.

- Equipment version options: electromagnetic remote control, lighting system

SUPER 600

This machine offers all application advantages of the SUPER 500 with multi-sweeper head coupled with a clearly enlarged container volume and adapted carriage.

SUPER 500

SUPER 600

Compact, robust and a multitalent in every discipline.

The SUPER 500 and SUPER 600 are compact, robust and genuine multitalents. They do superior work in park and leisure facilities, on extensively well-groomed surfaces, organic meadows, sports fields and golf courses. No matter the type of maintenance work at hand-sweeping, scarifying, mowing, collecting grass and leaves – the SUPER 500 and SUPER 600 will convince you.

- Easy adjustment of the working depth from minus 20 mm to plus 150 mm
- Easy accessibility of all components for cleaning and maintenance work as well as for tool exchange
- Electromagnetic remote control for all operator functions of the machine, comfortably right from the driver's seat
- Substantial reduction of dust formation and noise due to integrated exhaust air routing
- Rapid amortisation of the capital costs, since the machine is suited for nearly every application area all year round
