

# WHISPER TWISTER

Leaf blower for golf courses, athletic fields,  
and municipal surfaces

- Front or rear mount
- 180° swivel radius
- For tractors and front mowers from 25 HP

# WHISPER TWISTER

Thanks to the whisper turbine, the WHISPER TWISTER is ideal for use as a leaf blower in parks, in residential areas, on athletic fields, and on golf courses. The unique, patented 180° swivel mechanism allows the leaf blower to swivel with only one hydraulic cylinder or electric actuator.

Efficient all around work from left to right is also possible without turning around or backing up. The air nozzle is vertically adjustable so that the air stream can be adjusted up or down. The large support wheels always ensure effective ground adaptation on uneven terrain.

**Optional equipment:**

straight or swan neck nozzles are available that can be adjusted hydraulically, manually, or with an electric actuator

## The advantages:

**Powerful whisper turbine**  
Ideal for residential areas.

**Hydraulic propulsion**

**Individual airflow adjustment**  
Mechanical or hydraulic option available.

**180° swivel mechanism**  
permits operation in the required direction when travelling forwards.

**Stability**  
on uneven terrain ensured with the large support wheel.

Continuously variable  
180° swivel mechanism.

TECHNICAL DATA				
<b>Attachment:</b>	Front height of PTO shaft up to 45 cm	Front height of PTO shaft up to 45 cm	Front hydraulic	Drive Rear
<b>Machine length in approx. m:</b>	1,5	1,5	1,6	1,5
<b>Machine width in approx. m:</b>	0,9	0,9	0,9	0,9
<b>Drive over p.t.o. shaft with:</b>	1000 or 2000 RPM	1000 RPM		540 RPM
<b>Hydraulic drive:</b>			40 or 70 liters	
<b>Blowing speed appr. m/sec.:</b>	50	50	50	50
<b>Blowing performance appr. m³/min.:</b>	200	200	200	200
<b>Weight in approx. kg*:</b>	max. 170	max. 208	max. 195	max. 208

\*Depending of mounting part and equipment.
